

# STRONG SOLUTION, LIGHT APPROACH.

## LEVO Wall Formwork

**The lightweight, economical value driven wall formwork - designed exclusively for the USA.**

Tired of heavy loads that hinder efficiency? Build it the light way! The new LEVO wall formwork offers a smart construction solution with lightweight design, quick assembly, and enhanced security, making your project more efficient.

LEVO offers a fully imperial system that integrates US construction practices through integrated tie-off locations for fast forming. The system weight further allows for panels to be handled on the ground easily while also being robust enough for gang form operations.

Lighter to explore -  
Scan and learn more:

#### Light weight

The lightweight design allows continuous productivity on the job site as the panels can be carried and set up by hand.

#### Quick assembly

The formwork allows for quick assembly and rapid turnaround due to a minimum number of components to assemble.

#### Integrated safety

The integrated OSHA compliant tie-off points offer safe access options.

### An innovation you can lift.

The LEVO wall formwork is engineered to lighten the workload on construction sites across the USA, boosting efficiency. Its lightweight, imperial-sized panels allow for fast work and can simply be assembled by hand. The ergonomic design and integrated tie-off points offer safe access options and ensure higher safety for the workers. The system stands out by its extremely robust surface, which ensures a long durability. With a variety of panel sizes, integrated handles, and flexible walkway brackets, LEVO offers versatile solutions for various projects and application fields. As a true all-rounder, it adapts perfectly to your needs – making the future of construction even lighter.

Heights: 9' | 4' | 3';  
Widths: 3' | 2'-6" | 2' | 1'

Low weight of 6.62 lbs/sqf for a 9'x3' panel

Achieves full hydrostatic pour pressure in a single 9' pour height with only two ties

Multiple integrated handles for easy handling

OSHA compliant integrated tie-off points

Position walkway brackets at any strut level

Internal rust protection and external high grade powder coating

## Customer Benefits

- Light and robust imperial-sized wall formwork
- Increased efficiency due to lightweight panels that can be set up by hand and without crane
- Quick assembly and fewer components when stacking, thanks to the use of the DRS alignment coupler
- Cost effectiveness through versatility and long durability
- Practical use in multiple applications, such as walls, cores, foundations, and pilasters
- Increased safety due to multiple tie-off points
